

旺泓企业成立于 2010,最初由塑料大王台塑集團和日本昭和電工共同投资成立，一直专注于 LED、PD、光学设计 等各类光電材料产品发展和衍生。2018 年与 Anax 以及来自国际大厂核心团队完成整合，包括核心半導體技術及上下游優勢資源，之后完善了 3 大类产品

1,各种高规格 LED(高亮度,高精度), RGB+DRIVER 集成器件 (超小型,全球专利)

应用于高要求的照明,RGB 灯光各种效果显示等

2,光传感产品, 比如环境光感,心率光感,接近光感,

应用于智能照明, 安防, 穿戴,TWS 耳机等等

3,电源管理芯片, 应用 LCD 屏,高规格 MINI LED 屏以及充電器、適配器等

WH was founded in 2010, originally by the plastic King Tai Plastics Group and Japan Zhaohe electrician co-investment, has been focused on LED, PD, optical design and other kinds of optoelectronic materials products development and derivative. Integrated with the core team of Anax and the International Big Factory in 2018, including the core half-conductor technology and the upstream and downstream superior resources, then improved the three major categories of products

1, various high-specification LED (high brightness, high precision), RGB DRIVER integrated devices (ultra-small, global patent) for high-demand lighting, RGB lighting various effects display, etc.

2, light sensing products, such as ambient light, heart rate light, proximity light, intelligent lighting, security, wearable TWS headset, etc.,

3,power management chip applications, LCD screens, high-specification MINI LED screens and chargers, etc.
